PROFESSIONAL SUMMARY

Systems Engineering student and full stack developer with hands-on experience building and shipping production web applications across academic, clinical-research and freelance settings. Specialized in backend development with Node.js, Express, Java and Spring Boot, with a strong command of SQL databases and RESTful API design. Experienced with React and TypeScript front ends, microservice architectures, containerization with Docker, and cloud deployment on Vercel and AWS. A committed continuous learner who values clean architecture, automated testing, and honest, well-documented code.

TECHNICAL SKILLS

Frontend:	HTML, CSS, JavaScript, TypeScript, React, Next.js, Angular, Tailwind CSS
Backend:	Node.js, Express, Java, Spring Boot, Python, C/C++, RESTful APIs, JWT Authentication
Databases:	PostgreSQL, MySQL, MongoDB
DevOps & Tools:	Git, GitHub, GitHub Actions (CI), Docker, Postman, Linux, Figma

FEATURED PROJECTS

ByMe — Local Services Marketplace (Team Project · Lead Contributor) 2026 — Present

Freelance / Independent — Popayán, Colombia

- Led development (57 of 73 commits) of a full-stack marketplace connecting clients with verified local professionals, built with React, TypeScript and Vite.
- Designed the review, booking and document-verification flows across REST microservices behind an AWS API Gateway, with JWT-based role auth for client, professional and admin dashboards.
- Integrated the Google Maps API for service locations and set up a Vitest + GitHub Actions CI pipeline.

Academic Electives Manager — Full Stack (Team Project) 2025

FIET, Universidad del Cauca — Popayán, Colombia

- Built the React/TypeScript dashboard as lead contributor and contributed backend modules (Spring Boot) for a system that automates elective-course assignment for the department.
- Backend integrates the Google Forms API for preregistration and a companion Python microservice for assignment statistics, with an explicit state-machine pipeline for eligibility validation.

HVF Analyzer — Clinical Diagnostic Support Tool (Team Research Project) 2026

Universidad del Cauca — Popayán, Colombia

- Contributed to a PyQt6 desktop application that digitizes Humphrey visual-field exams for ophthalmology using OCR and computer vision.
- Rewrote the extraction pipeline's grid-fitting and region-localization logic to work from OCR content instead of fixed template coordinates, fixing failures on rotated or rescaled scans.

Developer Portfolio (Personal Project) 2026

Independent — Popayán, Colombia

- Designed and built this portfolio (Next.js 16, TypeScript, Tailwind CSS v4, Framer Motion) with server-rendered GitHub activity, full project case studies and complete SEO.
- Deployed on Vercel with automatic deploys on every push.

EDUCATION

B.Eng. in Systems Engineering 2021 — 2025

Universidad del Cauca — Popayán, Colombia

CERTIFICATIONS

- Fundamentos de Ciberseguridad — Cisco Networking Academy (2025)
